

Streets Update 7/18/18

Storm sewers:

- Are being mapped the week of August 13th
- This of course is weather permitting. If the company gets delayed it will push us back.

Sanitary Sewers:

- Hoping by publication this is completed. We are being told mid to late July they should be out. This will give us a better idea of the condition of the entire village sanitary sewer.

Have you had water in your basement.... Not sure if it is an SOS or WIB? Need to know how to report it?

SSO: A **sanitary sewer** overflow (**SSO**) is any overflow, spill, release, discharge or diversion of untreated or partially treated **wastewater** from a **sanitary sewer** system.

WIB: Water in basement, wastewater that backs up into building that are caused by blockages or flow conditions in a sanitary sewer other than a building lateral. WIB does not include the backup of sewage caused by a blockage or other malfunction

How to report an incident: You can visit <http://www.minervapark.org/index.htm> Click on the photo of the sewer There is a button that says report an incident. The link is also below. OR stop into the community building and request a form <https://form.jotform.us/mp2829/storm--sanitary-reporting>

Please clean the grass clippings and debris from in front of your homes in the gutter area. These items are ending up in the sewers and likely causing more blockages. If you are cutting the grass into the street don't forget to clean it up!

The next streets meeting is July 30th at 7:00 p.m.
